SQL   In-class   **Bakery**   **Name:**

Exercise: Queries

Q1. Write a query that lists goods that contain the string "danish" in their name.

Q2. Write a query that lists goods that are sold for a price less than $2.00. Order the results by price in ascending order. Only show 5 results.

Q3. Find the number of receipts from the customer with name 'Briony Williams'.

Q4. Find the total cost of all items on receipt 51991.

Q5. Find all goods (flavor, food and price) that were sold on receipt 51991.

Q6. Which are the top 5 most purchased flavors in the bakery?

Q7. Alas, we discovered that the apricots had expired, but we still shipped orders containing apricots on 2021-12-30. Which customer will need to be refunded (warned)?
